DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Bullard on 06/12/2008.

The application has been amended as follows:

IN THE SPECIFICATION

Please amend the Abstract on page 37 as follows:

~~The present invention provides an~~ An in-spray glow discharge ionization method and apparatus are provided ~~which can be used together or alternately with the most widely used ionization method of mass spectrometry, such as an atmospheric pressure chemical ionization (APCI) method or an electrospray ionization (ESI) method while enhancing ionization efficiency using a gas exhibiting Penning effect.~~ The in-spray glow discharge ionization apparatus has a supply port ~~[[A]]~~ supplying a fluid containing a compound to be measured, a gas blowing port ~~[[B]]~~ which surrounds the supply port ~~[[A]]~~ and which blows a gas exhibiting Penning effect to nebulize the fluid supplied from the supply port ~~[[A]]~~, a ground-side discharge electrode ~~[[E]]~~ provided at a generation port ~~[[C]]~~ at which the nebulized flow is generated, and a voltage application-side discharge electrode ~~[[F]]~~ which is disposed in the traveling direction of

the nebulized flow and opposed to the ground-side discharge electrode. In this in-spray glow discharge ionization method, while the fluid is nebulized by a spray gas (1), components of the compound to be measured which constitutes the fluid are ionized by the excited spray gas (1) exhibiting Penning effect, so that measurement is performed by a mass spectrometer.

The previous objection to the length of the specification has been obviated by this amendment, and is withdrawn.

Allowable Subject Matter

2. Claims 1-12 and 14-20 allowed.
3. The following is an examiner's statement of reasons for allowance: The applicant's amendment to claim 1 satisfies the requirements of the rejections under 35 U.S.C. 112 second paragraph, and these rejections are withdrawn. The applicant has submitted affidavits under 37 C.F.R. 1.132 signed by Shigeru Suzuki, Shinichi Sakai, and Akio Yasuhara, who are each listed as co-authors of the Suzuki reference, declaring that the ionization method and associated apparatus described on pages 764 and 765 of Suzuki originated with, or were obtained from, Shigeru Suzuki. The Suzuki reference, being published less than a year before the filing date of the present application, is therefore no longer considered prior art, as it is not the work of "another." All prior art rejections of the present claims were based upon the Suzuki reference, and are therefore withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2881

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL MASKELL whose telephone number is (571)270-3210. The examiner can normally be reached on Monday-Friday 8AM-5PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on 571/272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
